Edison's Light.

New York, 27.—The Sun says the electric lights in Monlo Park looked Jellow in contrast with the light of the full moon, last evening—as yellow as gas lights appear in contrast with the electric lights. A number of the globes containing the lights that bave been up 200, 300 and 400 hours, have been found to be cracked where the wires pierce the glass, and have been taken down. Their places have been filled with new lamns, none of which have yet cracked. Edison said, last evening, that these new lamps gave him good reason to believe they would not crack at all. He has now eighty-two lights aglow on the circuit. This is the largest number yet used. Three largest number yet used. Three largest number yet used. Three he willdings are now in course of erection on the laboratory grounds. One is for glass-showers, the second for fourteen dyname machines, by which Edison proposes to start 700 lights, and the third is a machine shop.

Mining Matters—Land Grants.

San Francisco, 27.—at the annual meeting of the Beicher Mining Company, to-day, the old board was re-elected, with the exception of F. A. Trille, in place of J. D. Fry. The present indebtedness of the company is \$44,236. The superintendent, in his report, after describing the year's operations, concludes by expressing great hope that the indications in the 2700-foot and 3000-foot levels will lead to valuable developments.
